

ACVATIX™

## 2-port and 3-port valves, externally threaded, PN16

VVG44..., VXG44..

**In small and medium-sized heating, ventilating and air conditioning systems as a control valve for mixing and diverting functions or as a shutoff valve. For closed circuits only.**

- Housing made of bronze CC499K
- DN 15...40
- $k_{vs}$  0.25...25 m<sup>3</sup>/h
- Flat sealing, externally threaded connections G..B, as per ISO 228-1
- Siemens can deliver fitting sets ALG.. with threaded connection and ALS.. with welded connection
- Manual adjustment by means of mounted knob
- Can be equipped with motorized SAS.. actuators

## Design

Valve cross-section:

### VVG44..

Guided parabolic plug, integrated in the valve stem.

The seat is pressed to the valve body with the aid of special gland material.

Caution: The 2-port seat valve does not become a three-port valve by removing the cover plate!

### VXG44..

Guided parabolic plug (as of DN25) which is integrated in the valve stem.

The seat is fitted in the through-port and attached directly to the valve body in the bypass.

From DN25, the seat in the through-port is attached directly to the valve body and fitted to the ring in the bypass.

## Sizing

Flow diagram:

$\Delta p_{max}$  = Maximum permissible differential pressure across the valve  
(VXG44...: mixing port: Ports A-AB, B-AB, diverting: Ports AB-A, AB-B),  
valid for the entire actuating range valve-actuator unit

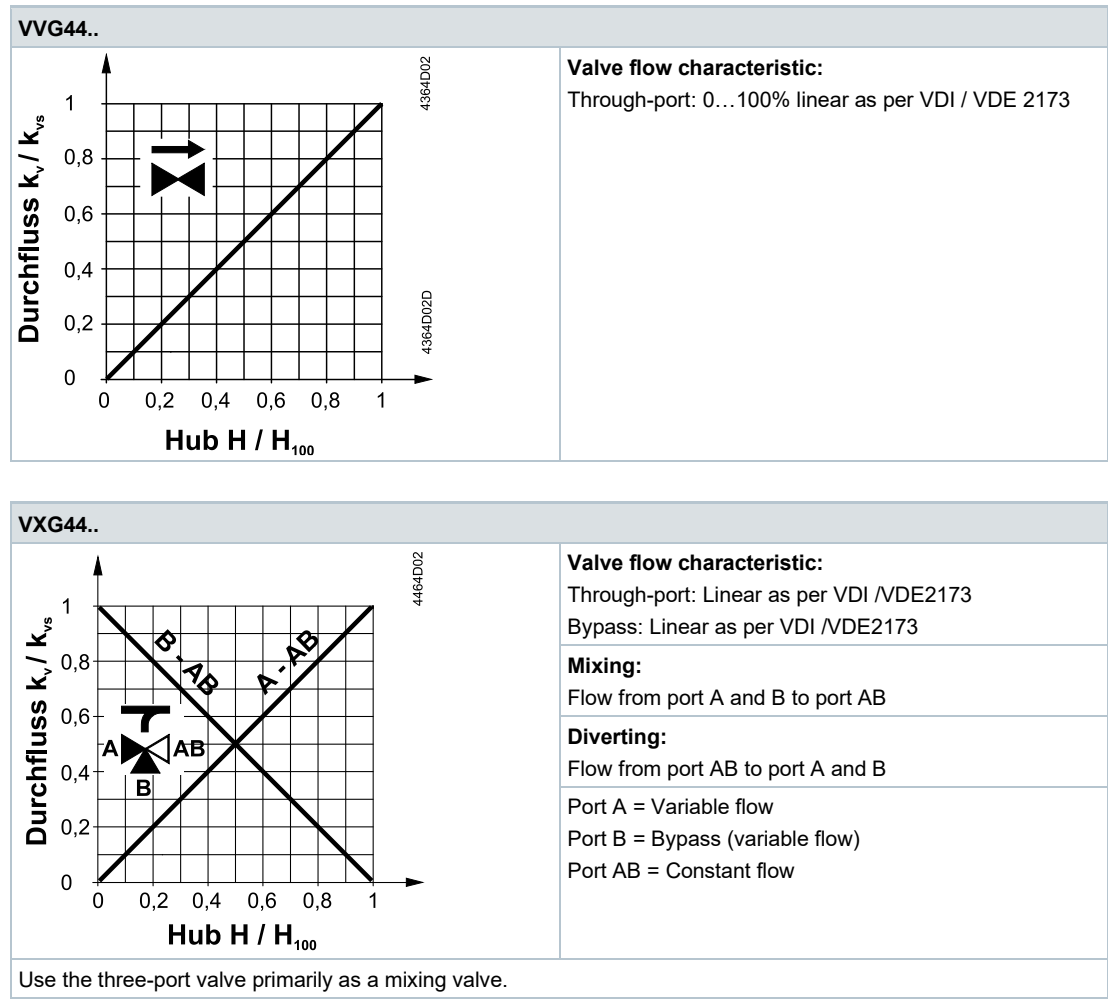

$\Delta p_{v100}$  = Differential pressure across the fully open valve and the valve's control path  
(VXG44...: A - AB, B - AB) at a volume flow  $\dot{V}_{100}$

$\dot{V}_{100}$  = Volume flow through the fully open valve ( $H_{100}$ )

100 kPa = 1 bar  $\approx$  10 mWS

1 m³/h = 0.278 l/s water at 20 °C

Valve flow characteristic

## Cavitation

Cavitation increases wear and tear on the parabolic plug and seat and results in unwanted noise. Cavitation can be prevented by not exceeding the differential pressures as per the flow diagram and maintaining the static pressures depicted below.

$\Delta p_{\max}$  = Differential pressure at a nearly closed valve to largely avoid cavitation

$p_1$  = Static pressure and the valve inlet

$P_3$  = Static pressure and the valve outlet

M Pump

J Water temperature

Example with hot water:

Pressure  $p_1$  at valve inlet: 500 kPa (5 bar)

Water temperature: 120 °C

The above diagram clearly indicates that the maximum permissible differential pressure is  $\Delta p_{\max} \rightarrow 200$  kPa (2 bar) at a nearly closed valve.

Note on chilled water applications

To prevent cavitation in chilled water circuits, sufficient counter pressure must be supplied to the valve output, e.g. using an additional butterfly valve downstream of the valve. Maximum permissible differential pressure over the valve: See 80 °C curve in the above diagram.

## Operating pressure and operating temperature

Liquids:

Operating pressure and medium temperature per ISO 7005

(Observe all local and applicable laws).

### Type summary

Type	DN	$k_{vs}$	$S_v$
		[m <sup>3</sup> /h]	
VVG44.15-0.25 VXG44.15-0.25	15	0.25	>50
VVG44.15-0.4 VXG44.15-0.4		0.4	
VVG44.15-0.63 VXG44.15-0.63		0.63	
VVG44.15-1 VXG44.15-1		1	
VVG44.15-1.6 VXG44.15-1.6		1.6	
VVG44.15-2.5 VXG44.15-2.5		2.5	
VVG44.15-4 VXG44.15-4		4	
VVG44.20-6.3 VXG44.20-6.3	20	6.3	>100
VVG44.25-10 VXG44.25-10	25	10	
VVG44.32-16 VXG44.32-16	32	16	
VVG44.40-25 VXG44.40-25	40	25	

DN = Nominal size

$k_{vs}$  = Flow nominal value for cold water (5...30 °C) through a fully opened valve (H100), at a differential pressure of 100 kPa (1 bar)

$S_v$  = Rangeability  $k_{vs} / k_{vr}$

$k_{vr}$  = Smallest  $k_v$  value at which the characteristic curve tolerance is still maintained, at a differential pressure of 100 kPa (1 bar)

### Fittings

Type	Stock number	Description
ALG..2	BPZ:ALG..2	2 piece fittings set for 2-port valves, existing of 2 cap nuts, 2 insert nuts, and 2 flat seals. ALG..2B are fittings made of brass for media temperatures up to 100 °C
ALG..2B	S55846-Z1..	
ALG..3	BPZ:ALG..3	3 piece fittings set for 3-port valves, existing of 3 cap nuts, 3 insert nuts, and 3 flat seals. ALG..3B are fittings made of brass for media temperatures up to 100 °C
ALG..3B	S55846-Z1..	
ALS..2	BPZ:ALS..	2 piece on pipe fittings set with welded connection for 2-port valves, existing of 2 cap nuts, 2 insert nuts, and 2 flat seals

## Ordering

Please indicate material, article type, order text, and quantity; example:

Material	Article type	Order text	Quantity
VVG44.25-10	VVG44.25-10	Valve.	3
ALG252B	S55846-Z104	Fitting sets	3

## Delivery

Valves, rotary actuators, and mounting kits are not assembled and are delivered in individual packaging and without a minimum order size.

## Product documentation

Related documents such as environmental declarations, CE declarations, etc., can be downloaded at the following Internet address:

<http://siemens.com/bt/download>

## Safety

	<p><b>⚠ DANGER</b></p> <p><b>There is a risk to operating personnel and device when working on the unit</b></p> <p>Failure to comply with these safety notes can result in personal injury and damage to property from pipe pressure, electrical voltage, or device in operation.</p> <p><input type="checkbox"/> Note the following when servicing a valve/actuator:</p> <ul style="list-style-type: none"> <li>• Switch off both pump and operating voltage.</li> <li>• Close shutoff valves.</li> <li>• Release pressure in the pipes and allow them to cool down completely.</li> <li>• Disconnect electrical connections from the terminals as needed.</li> <li>• The actuator must be properly installed or manually adjusted prior to recommissioning the valve.</li> </ul>
--	--

	<p><b>⚠ CAUTION</b></p> <p><b>National safety regulations</b></p> <p>Failure to comply with national safety regulations may result in personal injury and property damage.</p> <ul style="list-style-type: none"> <li>• Observe national provisions and comply with the appropriate safety regulations.</li> </ul>
--	--

## Engineering

We recommend installing the valve with spring return since temperatures are lower on heating plants which increases the lifespan of the sealing gland on the stem.

A filter must be installed upstream of the valve to increase functional safety.

## Mounting

It is easy to assemble the valve and actuator; it can be done at the construction site. No special tools or settings required.

Valve VVG44.. / VXG44.. is supplied with Mounting instructions M4364 (4 319 9564 0).

### Mounting position

## Pipe connection

Avoid leakage:

- Install fittings as per ISO 7-1.
- Do not use too much hemp or PTFE tape.
- Do not tighten pipe threading to "the very end".

## Flow direction

Make sure that the valve is mounted in the proper flow direction. A symbol is applied to the valve body:

VVG44.. :			
Flow direction:			
VXG44.. :			
Mixing A / B to AB:		Diverting AB to A / B:	

## Commissioning

The actuator must be properly mounted or manually adjusted before commissioning the valve.

VVG44..	
Turn the manual adjuster clockwise:	Valve opening = Increasing flow
Turn the manual adjuster counter clockwise:	Valve closing = Decreasing flow
VXG44..	
Turn the manual adjuster clockwise:	Through-put A – AB opens, bypass B closes
Turn the manual adjuster counter clockwise:	Through-put A – AB closes, bypass B opens

## Maintenance

Valves VVG44.. and VXG44.. are maintenance free.

### Stem sealing gland

The stem sealing gland cannot be exchanged. The entire valve must be replaced in the event of leakage. Contact your local Siemens office or branch for information.

## Disposal

	<b>⚠ WARNING</b>
	<b>Tensioned return spring</b> Opening the valve housing can release the tensioned return spring resulting in flying parts that may cause injury. <ul style="list-style-type: none"><li>• Do not open the valve body.</li></ul>
	The valve is considered electrical and electronic equipment for disposal in terms of the applicable European Directive and may not be disposed of as domestic garbage. <ul style="list-style-type: none"><li>• Dispose of the valve through channels provided for this purpose.</li><li>• Comply with all local and currently applicable laws and regulations.</li></ul>

## Warranty

Technical data on specific applications are valid only together with Siemens products listed under "Equipment combinations". Siemens rejects any and all warranties in the event that third-party products are used.

## Technical data
